

Who Stays, Who Leaves?

Neolut

A retention & engagement analytics story for a global Neo-Bank

Jun / 2026 - Batch 2281

Data Analytics Bootcamp - Le Wagon Berlin

TEAM

Project mission

Our mission is to identify the behavioral patterns that drive customer retention, helping Neolut understand **who stays** and **who leaves**.

So, Who stays? Who leaves?

Neolut

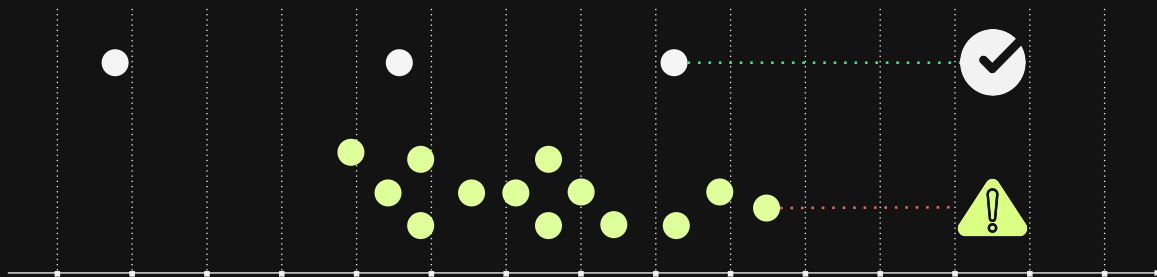

Defining the drop-off signal

We do not have clear churn event – Users simply reduce activity and eventually stop using their accounts;

Objective

- Detect patterns that precede inactivity
- Build a model to classify users at risk of churning

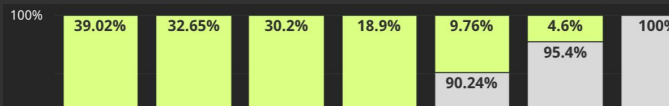

A user is considered at risk when they remain inactive for twice their usual time between transactions.

SEGMENTATION

Searching for risk patterns

RISK BY USAGE

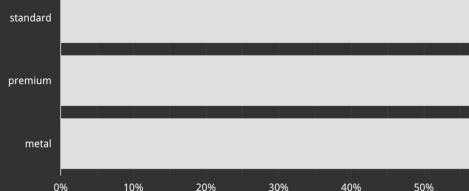

RISK BY COUNTRY

Card Payments | Crypto | Transfers
ATM | Exchange | TopUp | Cashback

RISK BY PLAN

RISK BY AGE

Turning Insights Into Action

ACTIVATION

- Focus on activating users on the first and second month
- Design a structured onboarding journey, with internal success metrics

DIVERSIFICATION

- Nudge customers to try out new features
- Guide onboarding flows for key features + Gamification

UPGRADE

- Encourage customers on upgrading to a paid plan
- Offer a free trial of Premium / Metal

THANK YOU!
